Certification of Functionality in Emergency Situation

Golden West Telecommunications Cooperative, Inc. (hereinafter "The Company") hereby certifies that it is able to function in emergency situations as set forth in §54.202(a)(2).¹ The Company's critical network infrastructure is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can take reasonable steps to reroute traffic around damaged facilities and manage traffic spikes throughout its network, as emergency situations require.

The capacity of the Company to function in emergency situations encompasses both voice and broadband.

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."

Description of Tribal Engagement

Golden West Telecommunications Cooperative, Inc. (hereinafter "the Company"), study area 391640, provides services to a small area on the Yankton Sioux Reservation. On October 15, 2014, by letter sent via certified mail to the Tribal Chairman, the Company requested a joint meeting with the Yankton Sioux Tribe to exchange information and discuss issues related to the deployment and provisioning of communications services on Tribal lands. The Company did not receive a response to the first letter; therefore, a follow up letter was sent via certified mail to the Tribal Chairman on December 3, 2014. No response was received from the follow up letter. The Company received the signed certified receipts back for both letters confirming delivery to the Chairman's office.

In accordance with provisions in the FCC's USF and ICC Transformation Order, paragraphs 636 and 637, and 47 CFR 54.313(a)(9), Golden West Telecommunications Cooperative, Inc. will again attempt to organize a joint meeting with the Yankton Sioux Tribe in 2015. If successful the Company, with Tribal input, will continue to evaluate the need for future service deployments on Tribal lands while working to overcome challenges associated with right-of-way and permitting processes. The feasibility and sustainability of communications services on Tribal lands will be discussed and the Company will, with assistance from the Tribal authorities, attempt to identify additional steps that can be taken to make essential communications services deployed on Tribal lands both feasible and sustainable. The Company and Tribal authorities will also discuss and explore ways in which they can coordinate to ensure that services are marketed on tribal lands in a manner that will relate to the community and resonate with consumers, with the aim of increasing service adoption.

In addition, the Federal Universal Service Charge is not assessed to consumers participating in Lifeline. Toll Blocking prevents the placement of all long distance calls for which a subscriber would be charged. Toll blocking is available to eligible consumers at no cost.
